MissionKeeper

November 2019

Start a Mission

Schedule a mission or start immediately from the field
Invite Users from your Organization or outside guests when additional expert insight is necessary

# Capture the Mission in Real Time

Utilize KSI's iOS mobile app to stream video and telemetry from DJI drones and device camera to get mulitple POV's

KSI's MissionCaster network enabled field encoder allows for additional sensors like ground robots and underwater ROV's to be inlcuded in the mission.

Collaborate, Review and Analyze

Remote Mission participants have access to all video and data feeds from anywhere in the world in near real-time.

Collaborate with other particiapants, pilots and field personnel for immediate decision making

Integration of video and data analytics
